ELSEVIER

European Journal of Operational Research 147 (2003) 680–682

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

www.elsevier.com/locate/dsw

Contents Volume 147

1 Transshipment of containers at a container terminal: An overview
I.F.A. Vis and R. de Koster

17 Optimal control of service rates and arrivals in Jackson networks
A. Azaron and S.M.T. Fatemi Ghomi

32 Price and delay competition between two service providers
M. Armony and M. Haviv

51 A multivariate statistical approach to reducing the number of variables in data envelopment analysis
L. Jenkins and M. Anderson

62 A new approach for controlling a hybrid stochastic manufacturing/remanufacturing system with inventories and different leadtimes
G.P. Kiesmüller

72 Resolving inconsistencies among constraints on the parameters of an MCDA model
V. Mousseau, J. Figueira, L. Dias, C. Gomes da Silva and J. Climaco

94 Dynamic parametric bounds on efficient outcomes in interactive multiple criteria decision making problems
I. Kaliszewski

108 On the relation between the Nash bargaining solution and the weighting method
F. Forgó and F. Szidarovszky

117 Ordinal criteria in stochastic multicriteria acceptability analysis (SMAA)
R. Lahdelma, K. Miettinen and P. Salminen

128 A hierarchical AHP/DEA methodology for the facilities layout design problem
T. Yang and C. Kuo

137 The geometric consistency index: Approximated thresholds
J. Aguarón and J.M. Moreno-Jiménez

146 On the distribution of calls in a wireless network driven by fluid traffic
A. Ule and R.J. Boucherie

156 Optimization of TQFP molding process using neuro-fuzzy-GA approach
T.-L. Chiang and C.-T. Su

165 The measurement of English and Welsh police force efficiency: A comparison of distance function models
L. Drake and R. Simper

187 A decision support system for the care of HIV and AIDS patients in India
P.R. Harper and A.K. Shahani

198 Allocating fixed costs and resources via data envelopment analysis
J.E. Beasley

217 Probabilistic programming for nitrate pollution control: Comparing different probabilistic constraint approximations
A. Kampas and B. White

doi:10.1016/S0377-2217(02)00117-6

217 Probabilistic programming for nitrate pollution control: Comparing different probabilistic constraint approximations
A. Kampas and B. White

doi:10.1016/S0377-2217(02)00117-6

229 Editorial: Fuzzy sets in scheduling and planning
Ph. Fortemps, B. De Baets and J. Fodor
231 Fuzzy scheduling: Modelling flexible constraints vs. coping with incomplete knowledge
D. Dubois, H. Fargier and Ph. Fortemps
253 Fuzzy temporal characteristics of operations for project management on the network models basis
A.I. Slyeptsov and T.A. Tyshchuk
266 On latest starting times and floats in activity networks with ill-known durations
D. Dubois, H. Fargier and V. Galvagnon
281 On two single machine scheduling problems with fuzzy processing times and fuzzy due dates
S. Chanas and A. Kasperski
297 Scheduling uncertain orders in the customer–subcontractor context
L. Geneste, B. Grabot and A. Letouzey
312 Handling flexibility in a "generalised job shop" with a fuzzy approach
S. Allet
334 A fuzzy genetic algorithm for driver scheduling
J. Li and R.S.K. Kwan
345 Scheduling parallel dedicated machines under a single non-shared resource
H. Kellerer and V.A. Strusevich
365 Algorithms for the variable sized bin packing problem
J. Kang and S. Park
373 The two- and m-machine flowshop scheduling problems with bicriteria of makespan and mean flowtime
A. Allahverdi
397 Differential approximation for optimal satisfiability and related problems
C. Bazgan and V.Th. Paschos
405 Uncapacitated point-to-multipoint network flow problem and its application to multicasting in telecommunication networks
K. Park and Y.-S. Shin
418 Insensitive light traffic in a cellular system with mobile subscribers
G. Yamazaki
430 Optimal task allocation and hardware redundancy policies in distributed computing systems
C.-C. Hsieh
448 Book Review
K. Krawiec
451 Ambulance location and relocation models
L. Brotcorne, G. Laporte and F. Semet
464 Capacity sizing in the presence of a common shared resource: Dimensioning an inbound call center
O.Z. Akşin and P.T. Harker
484 Heuristic optimization of experimental designs
M.A. Lejeune
499 Combining DEA and stochastic frontier models: An empirical Bayes approach
E.G. Tsionas
511 GI$|M/M/c$ queue with multiple acceptances in a window
Y.W. Shin
522 On the control of a compound immigration process through total catastrophes
A. Economou

530 Effects of a demand-curve's shape on the optimal solutions of a multi-echelon inventory/pricing model
A.H.L. Lau and H.-S. Lau
549 The production–inventory problem of a product with time varying demand, production and deterioration rates
S.K. Goyal and B.C. Giri
558 The single-item lot-sizing problem with immediate lost sales
D. Aksen, K. Altınkemer and S. Chand
567 Measuring and avoiding the bullwhip effect: A control theoretic approach
J. Dejonckheere, S.M. Disney, M.R. Lambrecht and D.R. Towill
591 Flow distance reduction for a multi-product flowline with sets of identical machines
A. Diponegoro and B.R. Sarker
613 Selecting hierarchical facilities in a service-operations environment
V. Jayaraman, R. Gupta and H. Pirkul
629 A guided local search heuristic for the capacitated arc routing problem
P. Beullens, L. Muyldermans, D. Cattrysse and D. Van Oudheusden
644 Minimizing due date related performance measures on two batch processing machines
C. Sup Sung and Y. Hwan Kim
657 Solving biobjective combinatorial max-ordering problems by ranking methods and a two-phases approach
M. Ehrgott and A.J.V. Skriver
665 Scheduling with general job-dependent learning curves
G. Mosheiov and J.B. Sidney
671 The Steiner cycle polytope
J.-J. Salazar-González
680 Contents Volume 147
